Modern Biotech

WATER QUALITY & ENVIRONMENTAL TESTING

Every sample gets a clean chain of custody, calibrated instruments, and a report you can hand straight to an inspector, a client, or your own peace of mind

- **27** Parameters Tested
- **05** Service Categories
- **100%** Lab-Verified Reports

ISO 9001 : 2015 | Certificate Number : 305026072870Q

ABOUT

Different water sources need different scrutiny. Below is the parameter set we run for each of our five service lines drawn from one lab panel, applied where it matters most.

OUR TESTING SERVICES

Drinking Water

15 parameters

Households, RO plants, packaged water units & public supply tested against IS 10500 potability norms.

pH • Conductivity • Turbidity • Total Dissolved Solids • Total Alkalinity • Chloride • Total Hardness • Calcium Hardness • Magnesium Hardness • Magnesium • Calcium • Sulphate • Acidity • Ammonia • Iron • Total Coliform • Fecal Coliform

Waste Water

15 parameters

Industrial effluent, STP/ETP outlets & discharge compliance built around pollution load and discharge-standard indicators.

pH • Conductivity • Turbidity • Total Dissolved Solids • Total Suspended Solids • Chloride • Oil & Grease • Nitrite • Sodium • Potassium • Total Coliform • Fecal Coliform

Hospital Purpose

11 parameters

Ward & dialysis water supply plus effluent from hospital treatment plants – dual focus on potability and

pH • Conductivity • Turbidity • Total Dissolved Solids • Total Alkalinity • Total Hardness • Chloride • Calcium Hardness • Magnesium Hardness • Magnesium • Calcium • Sulphate • Acidity • Iron • Ammonia • Total Coliform • Fecal Coliform • Sodium • Potassium

Fish Farming

13 parameters

Aquaculture ponds & hatcheries tuned to the water chemistry that governs fish health, growth, and pond

pH • Conductivity • Turbidity • Total Dissolved Solids • Total Alkalinity • Total Hardness • Calcium • Magnesium • Iron • Sulphate • Ammonia • Sodium • Potassium

Hotel & Auditorium

12 parameters

Guest-supply water, kitchens, pools & large public gatherings the potability checks that matter most at scale, plus periodic microbiological screening.

pH • Conductivity • Turbidity • Total Dissolved Solids • Total Alkalinity Total Hardness • Chloride • Sulphate • Iron • Total Coliform • E. Coli Fecal Coliform • Calcium Hardness • Magnesium Hardness • Magnesium • Calcium • Sulphate • Acidity • Ammonia

COMPLETE PARAMETER INDEX (28)

01 Acidity
02 Alkalinity (Total Alkalinity)
03 Ammonia
04 BOD
05 Calcium
06 Calcium Hardness
07 Chloride
08 COD
09 Conductivity
10 Fluoride
11 Iron
12 Magnesium
13 Magnesium Hardness
14 Nitrate
15 Nitrite
16 Oil & Grease
17 pH
18 Potassium
19 Sodium
20 Sulphate
21 Total Alkalinity
22 Total Dissolved Solids (TDS)
23 Total Hardness
24 Total Suspended Solids
25 Turbidity
26 Total Coliform
27 Fecal Coliform
28 E. coli
